This is CS50.
I’ll create a GUI interface using Visual Basic, see if I can track an IP address.

last time...
what ultimately matters in this course is not so much where you end up relative to your classmates but where you, in Week 12, end up relative to yourself in Week 0
can take CS50 Pass/Fail or for a letter grade
the course is not graded on a curve
those less comfortable and somewhere in between are not at a disadvantage vis-à-vis those more comfortable
each student’s final grade is individually determined at term’s end after input from the teaching fellows

I talk about cs50 so much that my teammates implemented a cs50-talk tax.

I get charged $1 for each mention of the class, I already owe $20 dollars and haven't been able to talk for more than five minutes without getting called out on it.

FML
I need you to sign off on my Phys.Ed homework.

This says you're supposed to do 100 sit-ups. You really did that many?

I did four.

Four isn't 100, Jason.

Allow me to explain the concept of binary numbers.

Allow me to explain the term "fat chance."
