# include <cs50.h>
# include <stdio.h>

int main(void)
{
    // get line of text
    printf("Say something: ");
    string s1 = GetString();

    // get another line of text
    printf("Say something: ");
    string s2 = GetString();

    // try (and fail) to compare strings
    if (s1 == s2)
        printf("You typed the same thing!\n");
    else
        printf("You typed different things!\n");
}
/* compare2.c

Computer Science 50
David J. Malan

Compares two strings.

Demonstrates strings as pointers to arrays.
***************************************************************************/

#include <cs50.h>
#include <stdio.h>
#include <string.h>

int main(void)
{
    // get line of text
    printf("Say something: ");
    char *s1 = GetString();

    // get another line of text
    printf("Say something: ");
    char *s2 = GetString();

    // try to compare strings
    if (s1 != NULL && s2 != NULL)
    {
        if (strcmp(s1, s2) == 0)
            printf("You typed the same thing!\n");
        else
            printf("You typed different things!\n");
    }
}
Tries and fails to copy two strings.

Demonstrates strings as pointers to arrays.

```c
#include <cs50.h>
#include <ctype.h>
#include <stdio.h>
#include <stdlib.h>
#include <string.h>

int main(void)
{
    // get line of text
    printf("Say something: ");
    char *s1 = GetString();
    if (s1 == NULL)
        return 1;

    // try (and fail) to copy string
    char *s2 = s1;

    // change "copy"
    printf("Capitalizing copy...\n");
    if (strlen(s2) > 0)
        s2[0] = toupper(s2[0]);

    // print original and "copy"
    printf("Original: %s\n", s1);
    printf("Copy:     %s\n", s2);

    // free memory
    free(s1);
}
```
