  </div>
</div>
```

# Firebase

- NoSQL Cloud Database
- data stored in JSON
- data synced across all connected clients in realtime
- data available when your app is offline

# AngularFire

(Three-Way Data Binding)

```
<html ng-app="helloWorld">
```

```
<div ng-controller="HelloCtrl">
  <input type="text" ng-model="name.text" />
  <p>Hello, {{name.text}}.</p>
</div>

.controller('HelloCtrl', ['$scope', '$firebaseObject',
function($scope,$firebaseObject) {
  var ref = new Firebase("https://<YOUR-APP>.firebaseio.com")
    .child("name")
  var syncObject = $firebaseObject(ref)
  syncObject.$bindTo($scope, 'name')
}])
```

```
<html ng-app="twitter50">
```

```
.controller('FeedCtrl', ['$scope', '$firebaseArray', function($scope, $firebaseArray) {
  var ref = new Firebase("https://<YOUR-APP>.firebaseio.com")
    .child("tweets")
  $scope.tweets = $firebaseArray(ref)
  $scope.post = function(tweet) {
    $scope.tweets.$add/angular.copy(tweet))
  }
}])
```

thank you
