

Gaming the System

I want to make a game...

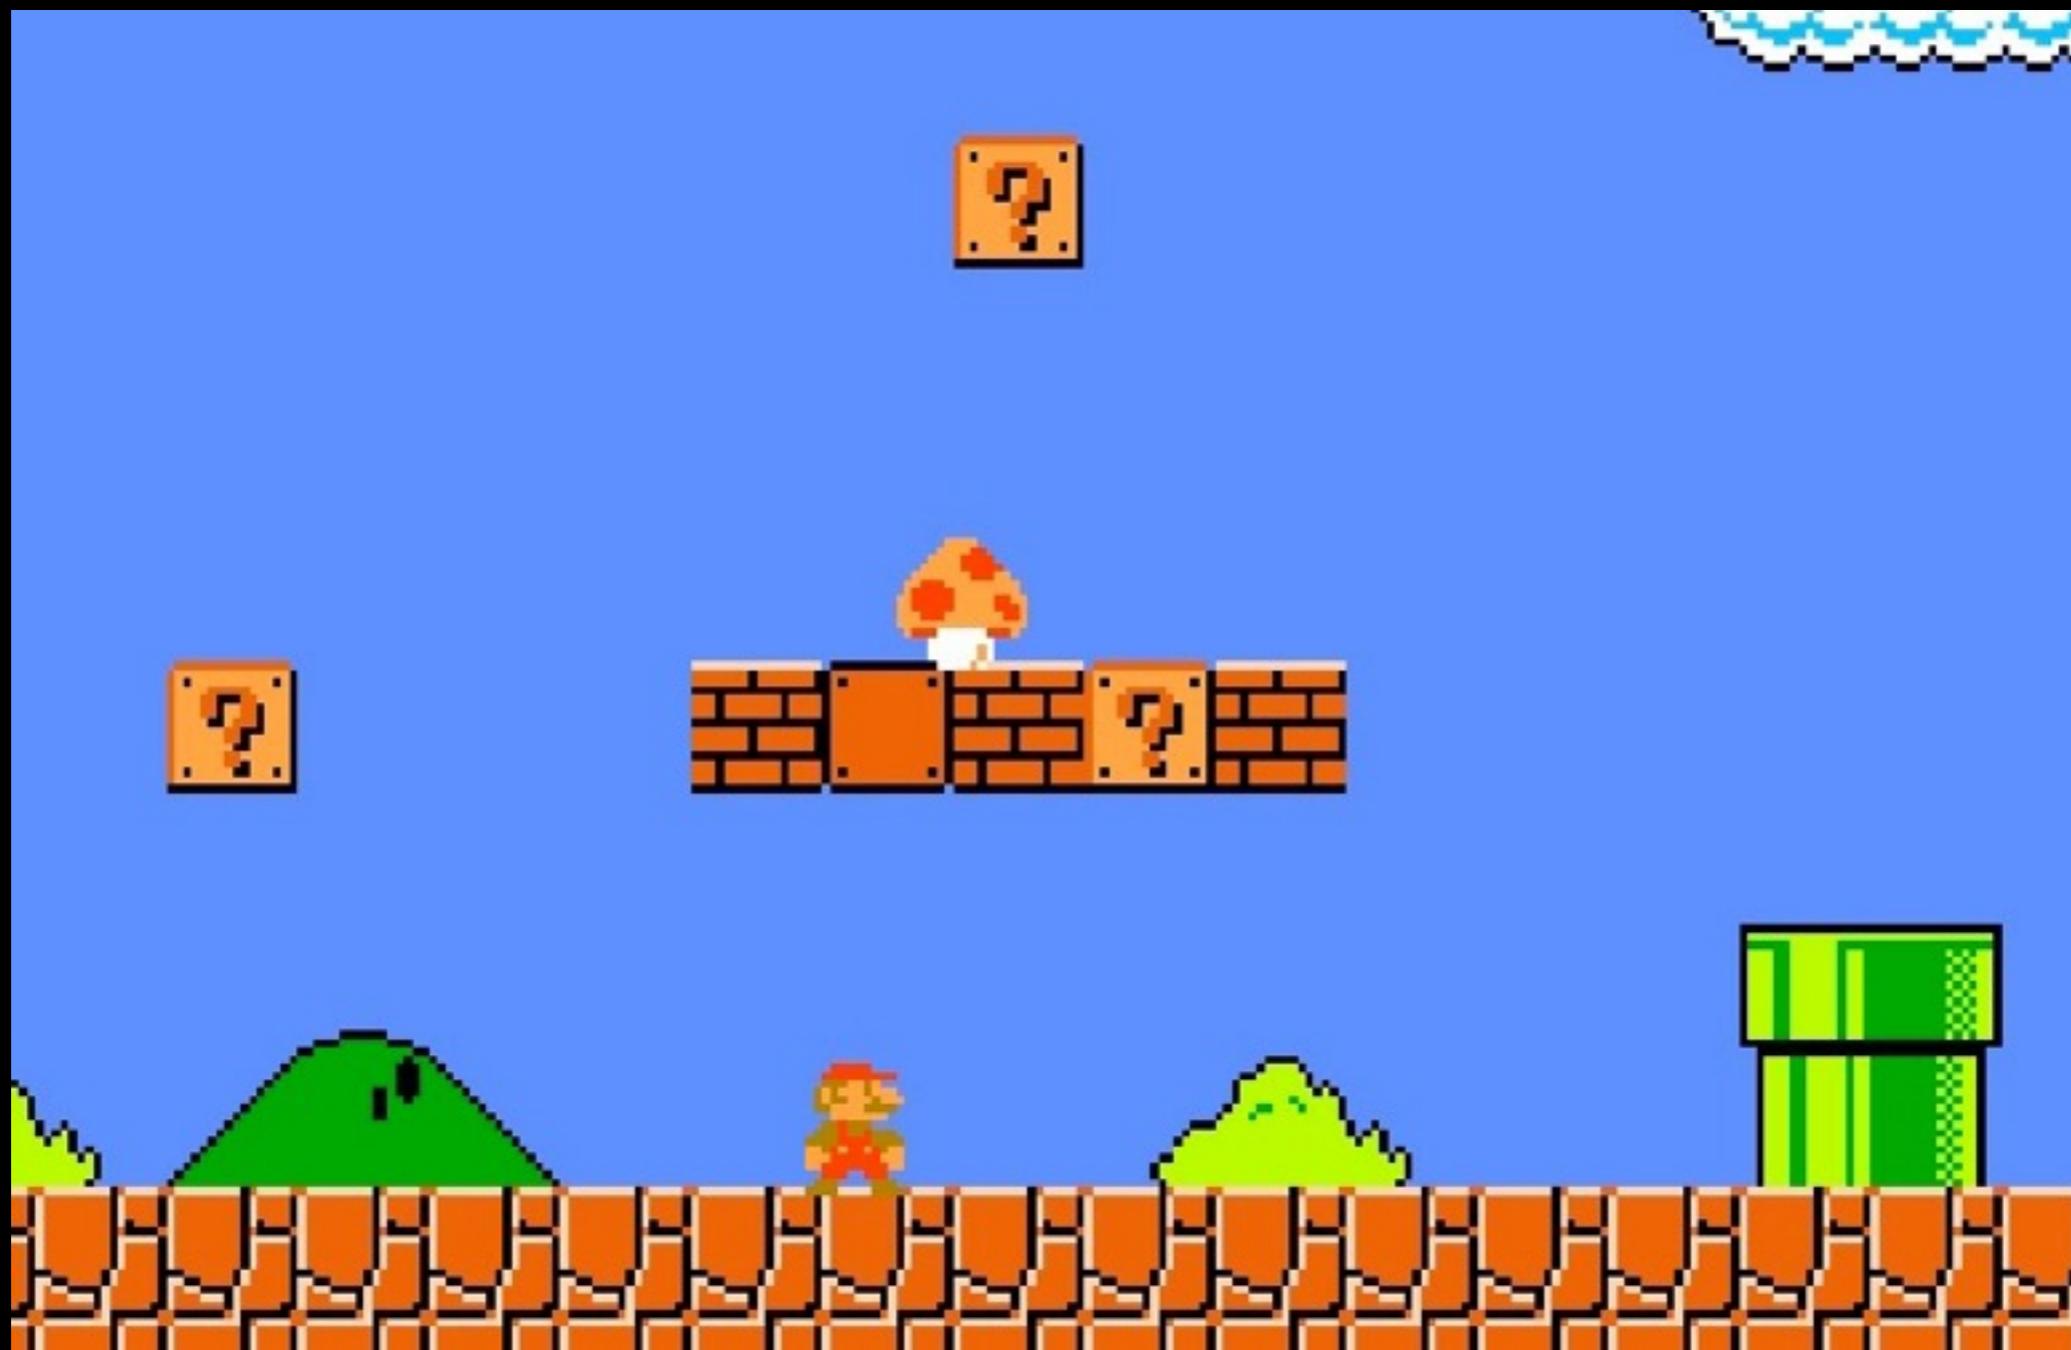

Is this a game?

What about this?

This?

?

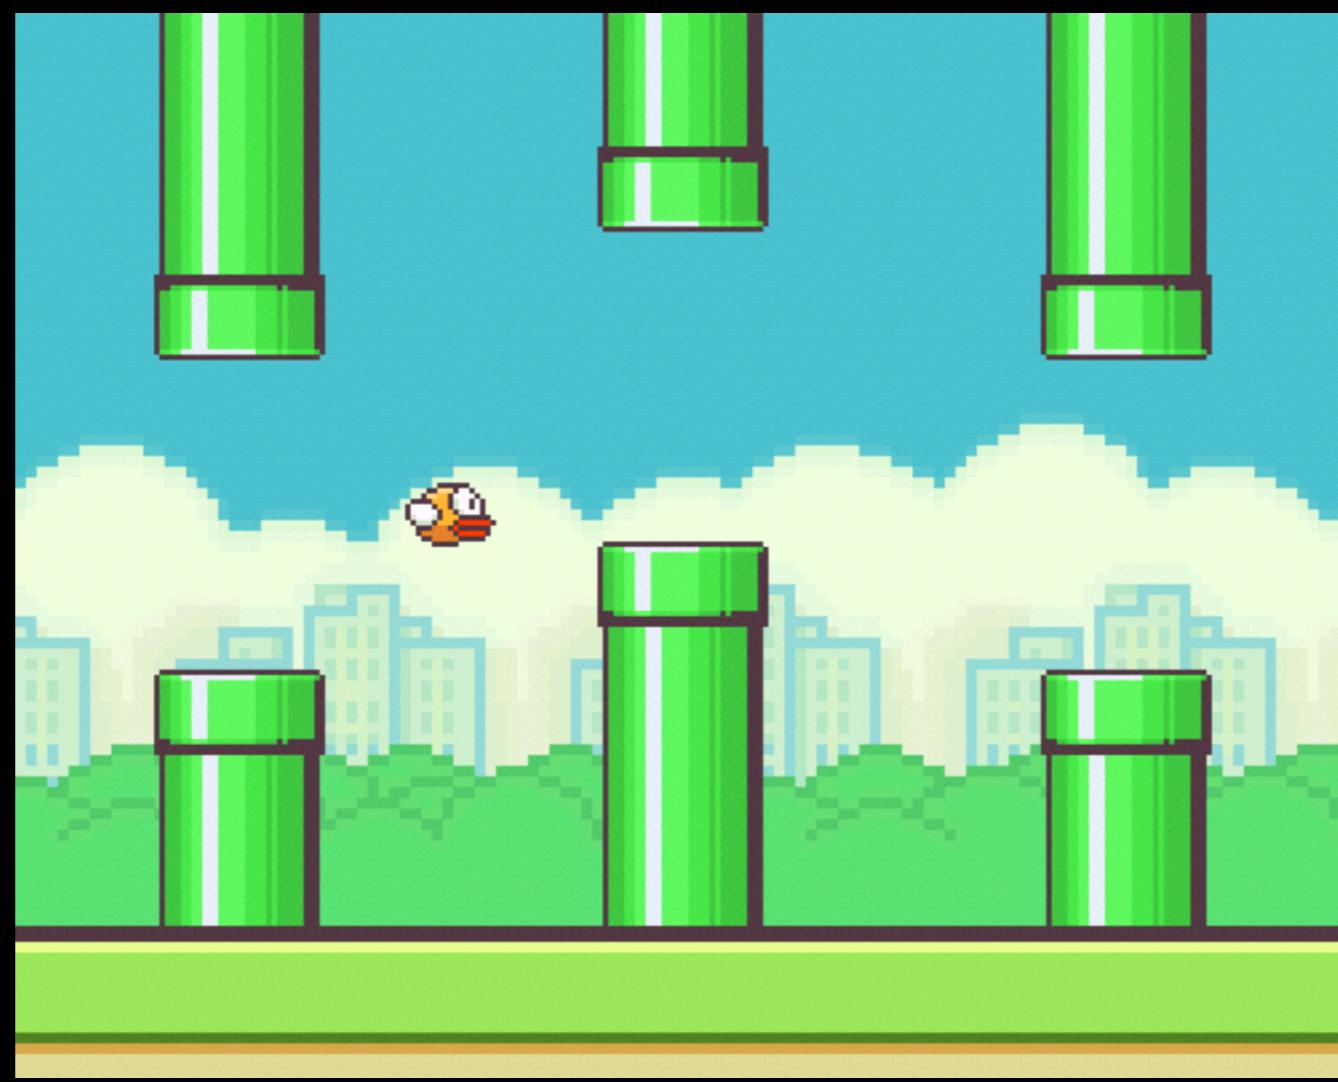

What even is this?

Tag?

“When you strip away the genre differences and the technological complexities, all games share four defining traits: a goal, rules, a feedback system, and voluntary participation.”

-Jane McGonigal

```
while (true) {  
    getInput();  
    update();  
    render();  
}
```

```
while (true) {  
    getInput();  
    update();  
    render();  
}
```

Input Pseudocode

```
void getInput() {  
    aDown = 0;  
    bDown = 0;  
  
    ...  
    if A button down  
        aDown = 1;  
    if B button down  
        bDown = 1;  
  
    ...  
}
```

```
while (true) {  
    getInput();  
    update();  
    render();  
}
```

Update Pseudocode

```
#define SPEED 5

void getInput() {
    //update player based on input
    player.velocity += aDown * SPEED
    //update objects based on physics
    //physics formulas to update player x,y
    //check for collisions
}
```

```
while (true) {  
    getInput();  
    update();  
    render();  
}
```

```
while (true) {  
    getInput();  
    update();  
    render();  
}
```
