

# TODO

- read distribution code
- register
- quote
- buy
- index
- sell
- history**
- additional feature

# history

- this depends on your implementation of **buy** and **sell**!
- chronology of the user's interactions
  - ▣ whether a stock was bought or sold
  - ▣ stock's symbol, the (purchase or sale) price
  - ▣ number of shares bought or sold
  - ▣ date and time at which the transaction occurred
