What is Python?

# Programming Language

- High-Level
- Dynamically-typed
- Supports many programming paradigms

Why bother learning  
Python?

```

1 #include <stdio.h>
2 #include <cs50.h>
3
4 int main(void)
5 {
6     int h = 24;
7     while (h < 0 || h > 23)
8     {
9         printf("Height: ");
10        h = get_int();
11    }
12    for (int i = h; i > 0; i--)
13    {
14        for (int j = 0; j <= h; j++)
15        {
16            if (j >= i - 1)
17                printf("#");
18            else
19                printf(" ");
20        }
21        printf("\n");
22    }
23 }
24

```

```

1 import cs50
2
3 h = 24
4 while h < 0 or h > 23:
5     print("Height: ", end="")
6     h = cs50.get_int()
7     for i in range(h, 0, -1):
8         for j in range(h + 1):
9             if j >= i - 1:
10                print("#", end="")
11            else:
12                print(" ", end="")
13        print("")
14

```
