- Lack of additional resources to more thoroughly/rigorously explain what was covered (even a pointer (hah) in the right direction would be good).

- Lack of additional resources to more thoroughly/rigorously explain what was covered (even a pointer (hah) in the right direction would be good).
- The grading schema, especially participation, is ambiguous, and should be better explained.

cs50.harvard.edu/hls/2021/winter/syllabus/#assignments

- 3 is reserved for exceptional answers that demonstrate a full understanding of the material in a manner that exceeds the course's expectations, which may sometimes involve external research. Please note that this does not necessarily mean a long answer; indeed, an overly long answer that introduces irrelevant information is not likely to receive a 3. Rather, a 3 is awarded to a thorough and well thought-out and prepared answer that focuses on the subject of the question being presented. Only a few 3s at most will be awarded per question.
- 2 is awarded for a good to great answer that demonstrates understanding of the material in a manner consistent with the course's expectations. Most correct answers will be graded a 2, and a score of 2 should be considered your benchmark for success.
- 1 is awarded for a poor to fair answer that either demonstrates partial understanding of the material or otherwise contains an error that suggests a misunderstanding of a key detail.
- 0 is given to answers that are incorrect, exceedingly brief, or blank.

- Lack of additional resources to more thoroughly/rigorously explain what was covered (even a pointer (hah) in the right direction would be good).
- The grading schema, especially participation, is ambiguous, and should be better explained.
- Sometimes we progress quite rapidly through the coding portions of the lessons, making it a little difficult to follow along.

- The grading schema, especially participation, is ambiguous, and should be better explained.
- Sometimes we progress quite rapidly through the coding portions of the lessons, making it a little difficult to follow along.
- Something I'm still struggling with is thinking about how to apply any of this in a law setting. I know I'm getting a much stronger grasp of the material and concepts as they are, but wonder if I would be able to converse with a client on anything really substantive.
