"You understand that we reserve the right to log or monitor traffic to ensure that these terms are being followed."

I'm terrified of my new TV: Why I'm scared to turn this thing on — and you'd be, too

From facial recognition to personal data collection, this thing is downright scary -- and so are the implications

A massive leak of private Snapchat pics — and an era when even 'disappearing' photos can reappear

The Snapchat leak is only the latest to hit today's profoundly insecure internet.

Epic Fail: Power Worm Ransomware Accidentally Destroys Victim's Data During Encryption

Stupid ransomware throws away the encryption key

A variant of the Power Worm ransomware is infecting computers, encrypting their data files, and throwing away the encryption key, all because of an error in the malware's programming.

What happened to your files?
All of your files were protected by a strong encryption with RSA-2048.
More information about the encryption keys using RSA-2048 can be found here: http://en.wikipedia.org/wiki/RSA_(cryptosystem)

What does this mean?
This means that the structure and data within your files have been irrevocably changed, you will not be able to work
with them, read them or see them, it is the same thing as losing them forever, but with our help, you can restore them.

How did this happen?
Especially for you, on our server was generated the secret key pair RSA-2048 - public and private.
All your files were encrypted with the public key, which has been transferred to your computer via the Internet.
Decrypting of your files is only possible with the help of the private key and decrypt program, which is on our secret server.

What do I do?
Alas, if you do not take the necessary measures for the specified time then the conditions for obtaining the private key will be changed.
If you really value your data, then we suggest you do not waste valuable time searching for other solutions because they do not exist.

For more specific instructions, please visit this home page:

1.http://lgemfolpt5ntjaot.onion.nu
Your ID# is **qDgx5Bs8H**

If for some reasons the address is not available, follow these steps:

1. Download and install tor-browser: http://www.torproject.org/projects/torbrowser.html.en
2. After a successful installation, run the browser and wait for initialization.
3. Type in the address bar: lgemfolpt5ntjaot.onion
4. Follow the instructions on the site.

IMPORTANT INFORMATION:

Your Home PAGE: http://lgemfolpt5ntjaot.onion.nu
Your Home PAGE(using TOR): lgemfolpt5ntjaot.onion
Your ID# (if you open the site (or TOR 's) directly): **qDgx5Bs8H**

Guaranteed recovery is provided before scheduled deletion of private key on the day of 11/28/2015 12:56:49

The price to obtain the decrypter goes from 2BTC to 4BTC on the day of 11/08/2015 12:56:49

This snooper's charter makes George Orwell look lacking in vision

"The new surveillance bill renders the citizen transparent to the state, putting every one of us under suspicion. It would serve a tyranny well"
